FROM OUR CEO

Transform 2025 with Cutting-Edge IT Skills and Certifications

Dear Valued Clients and Partners,

As we step into 2025, the demand for advanced IT skills and certifications is undeniable—especially with **Generative AI** reshaping government and enterprise sectors. At **ThinkB!G. LearnSmart**, we're focused on equipping organizations with the knowledge, expertise, and certifications needed to accelerate progress in this rapidly evolving landscape.

Our **2025 Live Virtual Expert-Led Training Calendar** is carefully crafted to empower professionals with high-demand skills in areas like **Generative AI for Adobe Creative Cloud**, **Microsoft productivity tools**, **508 Accessibility and Compliance**, **Digital Marketing**, and **eLearning solutions and more**. Delivered via our **VOLT® Platform**, these expert-led, hands-on courses ensure accessible, immersive learning experiences across the globe.

Our **Project-Based Training®** approach, empowering teams to "Learn While You Build," drives real-time application of new skills, allowing productivity to continue uninterrupted. These solutions, tailored to mission-critical government and enterprise needs, maximize production efficiency.

With our **SmartPass Learning License**, we can scale up skill development at all levels, ensuring both individuals and entire organizations have access to the skills necessary to thrive globally.

I hope you explore the **2025 Training Calendar** today and reach out to us for any unique training needs.

Thank you for working with us! Carpe diem!

Christine Abunassar

Remote Hands-On Live Learning from Anywhere!

- Join Online Live with our Virtual Classroom from a Browser.
- Convenient for Public, Custom Private, and/or One-on-One Classes.

Instructor-Led, NOT Self-Paced Learning!

- Our vetted expert-led, hands-on training provides a live, immersive learning experience from anywhere—offering greater flexibility, convenience, and innovation than traditional in-person training, *with no travel required!*
- Access for 1-year to the searchable class recording, digital references, and Certificate of Completion.

LOG ON to access Software & Files. No Installs or Downloads Required.

No Install Required, Class Set-Up:

- Access to Web Browser (Chrome preferred).
- Reliable high-speed Internet connection, as audio is handled through the online meeting.
  - Disconnect VPN during training.
- Participant's email and direct phone number for immediate communication and support.
- Hardware Required:
  - Microphone (built-in to your computer, or external) for two-way communication.
  - Headphones, earbuds, or computer speakers for live class audio.
  - Computer/Monitor: First screen to use for class exercises. Second screen to view instructor screen (second computer, monitor, iPad, and/or HDMI/VGA with TV).
  - Computer Mouse: Requested by your instructor
  - *Optional: Camera connected to computer for face-to-face classroom experience.*

Instructors View LOG ON Student Computers for Hands-On Learning Support.

- Instructor will have a live view of your screen for interactive support during class.
- Interact live with the Instructor & students, ask questions, perform hands-on exercises while viewing live classroom screen share.

Other Information!

Note: One Student Per VOLT registration. Violators required to pay for "sharing" students.

5 Days
In this comprehensive five-day Articulate 360 BootCamp training course, which includes Storyline 3 / 360 BootCamp and a one-day introduction to Articulate 360, you will progress from basic concepts to advanced techniques for creating engaging eLearning content in Articulate Storyline. On the fifth day, you will explore the features of Articulate 360, including Rise, Content Library, Review, Peek, and Replay.

Camtasia

TechSmith

Public Class
2 Days
Create impactful instructional content with screen recordings that clarify software usage and website navigation. Enhance your video production skills by incorporating media, annotations, and transitions, while capturing high-quality audio. Transform PowerPoint presentations into interactive online experiences using Picture-in-Picture functionality, and integrate quizzes to assess learner engagement. Learn to effectively demonstrate software features and share your videos with individuals, teams, or organizations for successful hybrid and online training experiences.

Captivate - BootCamp

Adobe

Public Class
4 Days
Gain skills in both introductory and advanced techniques for creating engaging eLearning content, including quizzes, demos, and simulations. Designed for new and intermediate to advanced users, the course covers essential topics such as creating responsive projects, importing from Microsoft PowerPoint, adding objects and animations, and implementing 508 accessibility features. Advanced topics include working with various types of variables, importing questions, managing responsive layers, sharing elements with your team, and utilizing JavaScript.

Captivate - Introduction

Adobe

Public Class
2 Days
Re-imagine learning by enabling the creation of engaging content such as quizzes, demos, and simulations for both desktop and mobile eLearning. In this hands-on training course, participants will build Captivate eLearning projects that include responsive designs, video demos, software simulations, and seamless integration with Microsoft PowerPoint. You will learn to enhance your projects by adding objects to the timeline, including text captions, shapes, and smart objects, as well as animating these elements and ensuring accessibility in HTML5 (508 compliance).

Captivate - Advanced

Adobe

Public Class
2 Days
Intermediate to advanced users will explore advanced eLearning tools for creating more complex content while enhancing their Adobe Captivate skills. This training course provides valuable tips and insider secrets to boost productivity and save time. Topics include working with various types of variables, importing questions, creating quizzes, using responsive layers, collaborating with your team, publishing in multiple formats, and integrating JavaScript with Captivate.

Storyline 3 / Storyline 360 BootCamp

Articulate

Public Class

4 Days

This Articulate Storyline 3 / Storyline 360 BootCamp combines both Introduction and Advanced training, equipping you with essential skills for creating compelling eLearning content. In the introductory section, you'll explore Storyline's views, project creation, slide management, object addition, audio and video integration (including 508 accessibility), triggers, actions, themes, quizzes, object states, software simulations, and LMS-optimized publishing. The advanced portion enhances your efficiency by focusing on variables, advanced triggers, sophisticated quizzes, custom interaction templates, project collaboration, and JavaScript integration.

Storyline 3 / Storyline 360 Introduction

Articulate

Public Class

2 Days

Gain the essentials for creating engaging eLearning content using Articulate Storyline. This course covers key topics such as navigating Storyline's interface and views, developing projects, managing slides, and incorporating objects. You'll learn to integrate audio and video while ensuring 508 Accessibility, add triggers and actions, customize themes and master slides, create quizzes, and define object states. Additionally, you'll explore recording software simulations and demos and publishing in various formats to optimize compatibility with different LMS platforms.

Storyline 3 / Storyline 360 Advanced

Articulate

Public Class

2 Days

Learn advanced features of Storyline to create sophisticated content in this training course. You will explore topics such as accelerating production flow with themes and slides, manipulating variables and advanced triggers, leveraging advanced capabilities for crafting questions and quizzes, designing custom interaction templates, collaborating with your team through project sharing and saving, and navigating publishing options for LMS and web. Additionally, you will learn to implement JavaScript within Storyline to enhance your projects.

Storyboarding for Online Learning

ThinkB!G Exclusive

Public Class

2 Days

A storyboard serves as a blueprint for your eLearning projects! In this hands-on Storyboarding for Online Learning course, participants will explore the fundamentals of storyboarding, including its elements, types, and processes. Attendees will learn how to plan and create effective storyboards while incorporating AI tools to support rapid content creation and editing. This training will equip them with the essential skills to design storyboards that enhance the success of their eLearning courses.

Articulate Storyline 360 Accessibility: Creating 508 Compliant eLearning Courses

Articulate

Public Class

2 Days

Designed for existing Storyline experienced users and/or those who have completed at a minimum our Storyline Introduction class, this hands-on Articulate Storyline 360 Accessibility training expands your skills to create 508-compliant eLearning courses that meet both 508 and WCAG guidelines. The course covers designing accessible navigation, visuals, audio, media, and animations for users with disabilities.

Microsoft

CLICK/TAP CLASS TITLE FOR PRICING AND SCHEDULING

Access 365 / 2019 / 2016 Core MOS Certification

Microsoft

Schedule a Date
2 Days
Certification Offered
Comprehensive introduction to database management, equipping you with essential skills to efficiently create, manage, and analyze data. Through hands-on exercises, you will learn to design tables, develop queries, create forms and reports, and utilize advanced features to streamline your workflows. Whether you're a beginner or looking to enhance your existing knowledge, this course will empower you to leverage Access for effective data organization and reporting.

Excel Advanced for Office 365/2021: Master Data Analysis with PivotTables

Microsoft

Public Class
2 Days
Training focuses on mastering data analysis using PivotTables in Office 365 and 2021. You will explore techniques to effectively organize, analyze, and visualize complex data sets. Through practical exercises, you will learn to create dynamic PivotTables, utilize calculated fields, and implement advanced filtering and sorting techniques. This course is designed for those looking to enhance their Excel skills and streamline data analysis processes for informed decision-making.

Excel for Office 365/2021 Introduction / MOS Certification

Microsoft

Public Class
2 Days
Certification Offered
Unlock the full potential of Microsoft Excel in this comprehensive Introduction course designed for all skill levels. Learn essential skills such as data entry, formula creation, and cell formatting, alongside powerful functions, sorting, filtering, and creating charts. Engage in hands-on exercises to enhance your ability to analyze and present data effectively. **Optional Add-On: MOS Certification Pack**, which includes the Introduction course, online exam prep tool, exam voucher with one retake, and proctoring for Excel MOS Certification.

Microsoft 365 Online Essentials: Overview of Teams, Outlook, SharePoint, and OneDrive

Microsoft

Public Class
2 Days
Explore the fundamentals of Microsoft 365 in this essential training course. Designed for users of all skill levels, you will gain a comprehensive understanding of core applications such as Word, Excel, PowerPoint, Outlook, Teams, SharePoint, and OneDrive. Through hands-on exercises, you will learn to create, collaborate, and communicate effectively in a cloud-based environment. This course equips you with the skills needed to enhance productivity and streamline workflows using Microsoft 365 tools, making it ideal for anyone looking to maximize their efficiency in today's digital workspace.

Outlook 365 / 2019 / 2016 Core MOS Certification

Microsoft

Schedule a Date
2 Days
Certification Offered
Enhance your email management and productivity skills with our Microsoft Outlook training course. This comprehensive program is designed for users of all skill levels and covers essential features such as organizing emails, managing calendars, scheduling meetings, and utilizing tasks and notes. Through hands-on exercises, you will learn how to effectively communicate, collaborate, and streamline your workflow using Outlook's powerful tools. Whether you are new to Outlook or looking to refine your existing skills, this course will equip you with the knowledge to maximize your efficiency and make the most of this essential productivity software.

Power BI - Intro

Microsoft

Public Class

2 Days

Unlock the power of data visualization with our Microsoft Power BI training course. This hands-on program is designed for beginners and intermediate users looking to enhance their data analysis skills. You will learn how to connect to various data sources, create compelling reports, and develop interactive dashboards. The course covers essential features such as data modeling, DAX formulas, and sharing insights effectively. By the end of this training, you will be equipped with the skills to turn raw data into actionable business intelligence, enabling you to make informed decisions and drive organizational success.

PowerPoint for Office 365/2021 MOS Certification

Microsoft

Public Class

2 Days

Certification Offered

Elevate your presentation skills with our Microsoft PowerPoint training course. This comprehensive program is tailored for beginners and intermediate users, guiding you through the essentials of creating dynamic and impactful presentations. You will learn to design engaging slides, incorporate multimedia elements, and utilize advanced features like animations and transitions. The course also covers best practices for delivering effective presentations and collaborating with others. By the end of the training, you'll be equipped with the skills to craft professional presentations that captivate your audience and communicate your message effectively. **Optional Add-On: MOS Certification Pack**, which includes the Introduction course, online exam prep tool, exam voucher with one retake, and proctoring for Excel MOS Certification.

Publisher

Microsoft

Adobe Creative Cloud Generative AI for Advanced Graphic Designers, Government & Teams

ThinkB!G Exclusive

Schedule a Date
1 Day
This course explores the integration of Generative AI into graphic design for Advanced Graphic Designers using Adobe Creative Cloud. Participants will gain insights into the concepts and applications of Generative AI in creative workflows, with a focus on utilizing AI-assisted features in Photoshop, InDesign, and Illustrator. Through hands-on exercises, students will customize their workspace and apply advanced techniques to real-world design projects, enhancing their creative processes and outcomes.

Acrobat Pro with AI BootCamp

Adobe

Public Class
4 Days
Boost your PDF management skills with our Adobe Acrobat Bootcamp, tailored for beginners and advanced users alike. This intensive program merges the Introduction and Advanced classes, covering essential features like document creation, editing, form design, and security.

Acrobat Pro with AI ACP Certification

Adobe

Public Class
4 Days
Certification Offered
Enhance your PDF management skills with our Adobe Acrobat Bootcamp, designed for both beginners and advanced users. This intensive program combines the Introduction and Advanced classes, covering document creation, editing, form design, and security. With your ACP Certification Bootcamp purchase, you'll receive the online ACP Exam Prep tool, an exam voucher, and a complimentary retake with proctoring to become an Adobe Certified Professional.

Acrobat Pro with AI Introduction

Adobe

Public Class
2 Days
Learn the fundamentals of Adobe Acrobat Pro in this hands-on introductory course. Designed for beginners and professionals, you'll learn to create, edit, and manage PDF documents efficiently. Topics include navigating the user interface, editing text and images, collaborating on documents, creating interactive forms, and ensuring accessibility for all users. With practical exercises and expert guidance, you'll gain the skills needed to enhance your document management capabilities.

Acrobat Pro with AI Advanced

Adobe

Public Class
2 Days
Elevate your skills in Adobe Acrobat Pro with our advanced course designed for experienced users. This comprehensive training focuses on complex document management techniques, including advanced editing, creating and optimizing interactive forms, and automating workflows. Learn to enhance document security with digital signatures and encryption, and explore accessibility features to meet compliance standards.

Canva with AI and Video Editing BootCamp

ThinkB!G Exclusive

Public Class
4 Days
This comprehensive course integrates both the Introduction and Advanced classes into a single, cohesive learning experience, allowing you to create stunning visuals and dynamic video content using Canva's powerful tools and AI features. Ideal for beginners and intermediate users, you will learn to design eye-catching graphics, enhance your projects with AI-driven insights, and produce engaging videos that captivate your audience.

Canva with AI Introduction

ThinkB!G Exclusive

Public Class
2 Days
Designed for beginners, this hands-on course teaches you how to navigate Canva's user-friendly interface while integrating AI tools to enhance your design projects. Learn to create stunning graphics, presentations, and social media content effortlessly.

Canva Advanced with AI and Video Editing

ThinkB!G Exclusive

Public Class
2 Days
Take your design skills to the next level with our Advanced to Canva with AI training class. This course is tailored for users familiar with Canva who want to leverage AI tools for more sophisticated design projects. Participants will explore advanced features, including enhanced collaboration techniques, custom templates, and automated design processes, all while creating stunning visuals.

ePUB - Digital Publications for Web & Mobile Devices

ThinkB!G Exclusive

Schedule a Date
2 Days
Designed for beginners and intermediate users, this course covers essential techniques for designing, formatting, and exporting eBooks using Adobe InDesign. Learn to create visually engaging layouts, incorporate multimedia elements, and ensure compatibility across various eReader devices. By the end of the course, you'll have the skills to produce professional-quality eBooks.

Illustrator with AI BootCamp

Adobe

Public Class
4 Days
The Adobe Illustrator with AI Bootcamp combines the Introduction and Advanced courses into a comprehensive training experience.

Illustrator with AI ACP Certification

Adobe

Public Class
4 Days
Certification Offered
This Adobe Illustrator with AI ACP Certification Bootcamp combines the Introduction and Advanced courses, offering the online exam prep tool, an exam voucher, and a complimentary retake with proctoring.

Illustrator with AI Introduction

Adobe

Public Class
2 Days
This course is tailored for beginners and covers fundamental tools and techniques for creating stunning vector graphics. Learn how to navigate the Illustrator interface, create shapes, apply colors, and use text effectively. By the end of the course, you'll have the skills to bring your creative ideas to life and produce professional-quality designs.

Illustrator with AI Advanced

Adobe

Public Class
2 Days
Designed for experienced users, this course delves into advanced techniques for creating complex vector graphics, utilizing custom brushes, and mastering typography. Explore features like advanced path editing, blending modes, and design workflows to enhance your creative projects.

InDesign with AI BootCamp

Adobe

Public Class
4 Days
Enhance your design expertise in our Adobe InDesign Bootcamp, which includes both the Introduction and Advanced classes. This comprehensive program covers essential tools and techniques for creating stunning layouts and professional-quality documents.

InDesign with AI ACP Certification

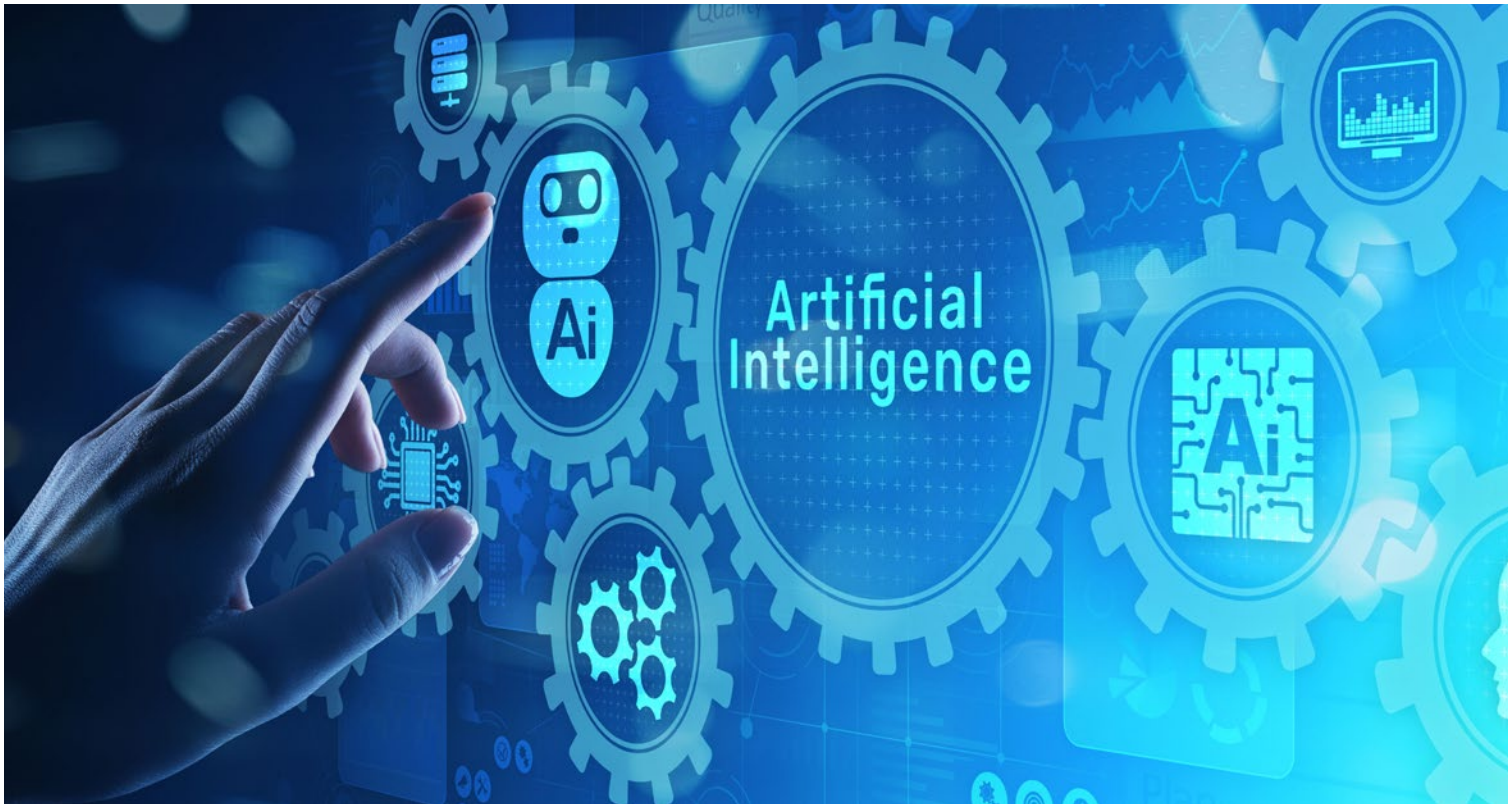
Adobe

Public Class
4 Days
Certification Offered
Certification Bootcamp includes both the Introduction and Advanced classes, designed to enhance your design expertise. Participants will also receive access to the online exam prep tool, an exam voucher, and one retake with proctoring.

InDesign with AI Introduction

Adobe

Public Class
2 Days
Designed for beginners, this course introduces you to the essential tools and features of InDesign, with a focus on layout design and document creation. You will learn to format text, integrate images, and create professional-quality layouts for print and digital media.



InDesign with AI Advanced

Adobe

Public Class
2 Days
This course is tailored for experienced users and covers advanced techniques in layout design, including master pages, styles, and interactive documents. You'll learn how to optimize workflows, incorporate advanced typography, and create dynamic layouts for both print and digital media.

InDesign Long Documents

Adobe

Public Class
2 Days
Master the art of designing long documents with our InDesign Creating Long Documents course. This specialized program focuses on advanced techniques for efficiently managing and formatting extensive materials, including books, reports, and manuals. You'll learn how to use styles, create master pages, and implement effective layout strategies to ensure consistency and professionalism in your long-form projects.

InDesign Accessibility Creating 508 Compliant PDFs

ThinkB!G Exclusive

Public Class
2 Days
Enhance your design skills with our InDesign Accessibility Training Class, focused on creating documents that are inclusive and accessible to all users. This course covers essential techniques for implementing accessibility features in your InDesign projects, including proper use of styles, tags, and alternative text.

Infographics Using Adobe Illustrator

ThinkB!G Exclusive

Public Class
2 Days
Designed for users with Illustrator experience, this course teaches the art and science of creating compelling infographics that convey complex information visually. You'll learn essential design principles, data visualization techniques, and how to effectively utilize Adobe Illustrator to craft captivating infographics. By the end of the course, you'll be equipped to transform data into impactful visuals that enhance understanding and engagement.

Infographics Using PowerPoint & Excel

ThinkB!G Exclusive

Public Class
2 Days
This course is designed to teach you how to create visually compelling infographics using the powerful features of Excel and PowerPoint. You'll learn techniques for data visualization, effective layout design, and best practices for communicating complex information clearly and engagingly. By the end of the class, you will be equipped to transform raw data into eye-catching visuals that captivate your audience and enhance your presentations.

LiveCycle Designer - Intro (AEM Forms)

Adobe

Public Class
2 Days
Unlock the potential of Adobe Acrobat LiveCycle Designer in our specialized training course. Designed for users looking to create dynamic forms and documents, this course covers essential features such as layout design, data binding, and form validation. You will learn how to efficiently build interactive forms that enhance user experience and streamline data collection.

Typography Using Adobe Illustrator & InDesign

ThinkB!G Exclusive

Public Class
2 Days
Learn the essential principles of typography and its role in effective visual communication. This course covers key topics such as font selection, hierarchy, spacing, and layout, empowering you to create visually appealing and readable text for various media.

Photoshop with AI BootCamp

Adobe

Public Class
4 Days
Photoshop BootCamp, which combines both Introduction and Advanced courses for a comprehensive learning experience. Designed for users seeking to enhance their skills, this BootCamp covers fundamental tools and techniques for photo editing, image manipulation, and graphic design. You will explore advanced techniques such as complex retouching, creative compositing, and sophisticated layer management.

Photoshop with AI ACP Certification

Adobe

Public Class
4 Days
Certification Offered
Combining both Introduction and Advanced courses, the Photoshop ACP Certification BootCamp offers a comprehensive learning experience. Designed for users aiming to enhance their skills, this BootCamp covers essential tools for photo editing, image manipulation, and graphic design, along with advanced techniques like complex retouching and creative compositing. With your BootCamp purchase, you will receive access to the online exam prep tool, an exam voucher, and a complimentary retake with proctoring.

Photoshop with AI Introduction

Adobe

Public Class
2 Days
Specifically designed for beginners, this course introduces the fundamental tools and features of Adobe Photoshop. You will explore essential techniques for photo editing, image manipulation, and basic graphic design. Learn how to navigate the interface, work with layers, and apply filters to enhance your images. By the end of the course, you will possess the foundational skills to confidently create and edit stunning visuals.

Photoshop with AI Advanced

Adobe

Public Class
2 Days
Elevate your Photoshop skills in our Advanced Training Classes, designed for users with a foundational understanding of the software. This course delves into advanced techniques such as complex photo retouching, creative compositing, and sophisticated layer management. You will learn how to utilize advanced filters, apply blending modes, and enhance images with professional-grade editing techniques.

Video Production & 3D Animation

Adobe Creative Cloud Generative AI for Advanced Video Producers, Government & Teams

ThinkB!G Exclusive

Schedule a Date
1 Day
This advanced course empowers experienced Video Producers to integrate Generative AI into their workflows using Adobe Creative Cloud. Participants will explore sophisticated AI features in Premiere Pro, After Effects, and Audition, enhancing their editing and production processes. Through hands-on exercises, students will refine their projects with AI-driven techniques, optimizing visuals and audio to achieve professional-quality results.

After Effects with AI BootCamp

Adobe

Public Class
4 Days
Develop comprehensive skills in Adobe After Effects with this immersive BootCamp, combining both the Introduction and Advanced courses. Ideal for professionals looking to build a full range of abilities in motion graphics and visual effects.

After Effects with AI ACP Certification

Adobe

Public Class
4 Days
Certification Offered
Elevate your Adobe After Effects skills with this all-in-one BootCamp, combining Introduction and Advanced courses with the ACP Certification Pack. Acquire essential motion graphics and visual effects techniques, from basic animation to advanced compositing. Participants gain access to an online exam prep tool, an exam voucher with one retake, and exam proctoring. Ideal for professionals looking to validate their skills in video production and design.

After Effects with AI Introduction

Adobe

Public Class
2 Days
Gain a foundational understanding of motion graphics and visual effects with Adobe After Effects in this comprehensive introductory course. Designed for beginners, this course provides hands-on training in key features and techniques, including keyframing, masking, and compositing, to enhance video production projects. Whether you're a creative professional or looking to expand your skill set, this course will equip you with the tools to create polished animations and dynamic visual effects. Perfect for professionals in design, marketing, and media.

After Effects with AI Advanced

Adobe

Public Class
2 Days
Elevate your motion graphics and visual effects skills with this Advanced Adobe After Effects course. Designed for experienced users, this hands-on training covers advanced techniques such as 3D animations, motion tracking, expressions, and complex compositing workflows. Ideal for professionals in video production, animation, and design seeking to master high-level features and streamline their creative processes.

Audio Recording Fundamentals & Adobe Audition BootCamp

ThinkB!G Exclusive

Public Class
4 Days
This immersive BootCamp includes 2 days of foundational audio recording skills alongside the comprehensive 2-Day Audition course. Participants will cover essential concepts such as sound principles, equipment setup, and recording techniques, gaining hands-on experience in microphone placement and audio mixing. The curriculum also includes instruction on noise reduction and audio restoration, enabling participants to produce high-quality audio projects. Ideal for aspiring audio professionals and enthusiasts, this BootCamp is designed to elevate your recording capabilities and enhance your proficiency in audio production.

Audio Recording Fundamentals Using Audition

ThinkB!G Exclusive

Public Class

2 Days

This comprehensive course equips participants with the essential skills and knowledge for effective audio recording. Covering the fundamentals of sound, recording equipment, and techniques, students will learn about microphone types, audio interfaces, and proper setup for various sound sources. Participants will practice microphone placement and basic audio editing. Designed for aspiring audio professionals and enthusiasts looking to enhance their recording skills.

Audition

Adobe

Public Class

2 Days

Enhance your audio editing and production skills with our hands-on training classes. This course covers essential tools and techniques for recording, editing, and mixing audio. Participants will learn about noise reduction, audio restoration, and advanced effects, enabling them to create high-quality soundtracks for various projects. Designed for both beginners and those looking to refine their skills, this training equips you with the knowledge to confidently navigate audio editing software and elevate your audio projects.

Blender for 3D Animation

ThinkB!G Exclusive

Public Class

2 Days

Enhance your 3D animation skills with this comprehensive course designed for both beginners and those looking to refine their expertise. Participants will explore the fundamentals of 3D animation, including modeling, texturing, rigging, and animating characters and objects. Through hands-on experience, you will learn essential techniques to create stunning animations and visual effects while discovering best practices for workflow efficiency. Ideal for aspiring animators and artists.

Cinema 4D - BootCamp

Maxon

Schedule a Date

4 Days

This intensive BootCamp combines the Introduction and Advanced courses in 3D modeling, animation, and rendering using industry-standard software. Participants will engage in hands-on projects covering essential skills such as object creation, texturing, lighting, rigging, and visual effects. Designed for both beginners and experienced users, this comprehensive training equips students with the expertise needed to bring their creative visions to life and excel in the world of 3D design.

Cinema 4D - Intro

Maxon

Schedule a Date

2 Days

This Introduction course offers a foundational understanding of 3D modeling, animation, and rendering with industry-standard software. Participants will explore essential techniques for creating captivating visuals, focusing on object creation, texturing, and lighting. Engaging in hands-on projects, students will cultivate the skills necessary to turn their creative ideas into reality, making this course perfect for beginners and anyone looking to advance their 3D design expertise.

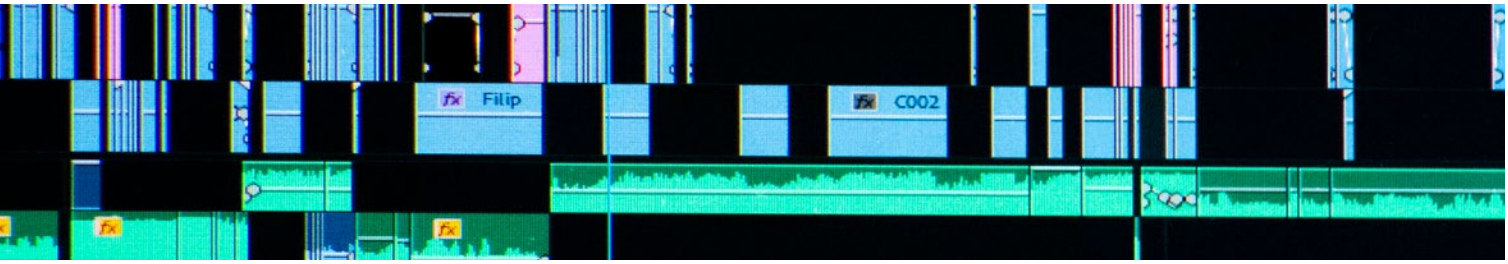
Cinema 4D - Advanced

Maxon

Schedule a Date

2 Days

This advanced course delves deeper into the capabilities of 3D modeling, animation, and rendering using industry-standard software. Participants will explore complex techniques such as advanced texturing, character rigging, dynamics, and visual effects. Through hands-on projects, students will refine their skills and learn to create sophisticated animations and stunning visuals. Designed for those with a foundational knowledge of 3D design.



Cinema 4D Lite with After Effects

Maxon

Schedule a Date
2 Days
This intensive BootCamp combines the Introduction and Advanced courses in 3D modeling, animation, and rendering using industry-standard software. Participants will engage in hands-on projects covering essential skills such as object creation, texturing, lighting, rigging, and visual effects. Designed for both beginners and experienced users.

DaVinci Resolve Certification BootCamp

Blackmagic Design

Public Class
2 Days
Certification Offered
This Certification BootCamp combines the Introduction and Advanced classes in DaVinci Resolve, equipping participants with comprehensive skills in video editing, color correction, and audio post-production. Through hands-on projects and practical exercises, students will master the software's features and advanced workflows, preparing them for certification. Ideal for beginners and experienced video professionals alike, this immersive training enhances video production capabilities and fosters creativity.

DaVinci Resolve Introduction

Blackmagic Design

Public Class
2 Days
This course introduces DaVinci Resolve, emphasizing essential skills in video editing, color correction, and audio post-production. Through hands-on projects, participants will learn to navigate the software's features and best practices. Ideal for beginners and aspiring video professionals,

DaVinci Resolve Advanced

Blackmagic Design

Public Class
2 Days
Designed for experienced users, this Advanced course delves into the intricate features of DaVinci Resolve, focusing on sophisticated video editing, color grading, and audio post-production techniques.

Maya (Autodesk) - Intro

Autodesk

Schedule a Date
2 Days
This course provides a foundational Introduction to Autodesk Maya, focusing on essential 3D modeling, animation, and rendering techniques. Participants will engage in hands-on projects to learn the software's core features, including object creation, texturing, and lighting. Ideal for beginners, this training equips students with the skills needed to start creating stunning 3D visuals.

Maya (Autodesk) - Advanced

Autodesk

Schedule a Date
2 Days
This Advanced course focusing on complex 3D modeling, animation, and rendering techniques. Participants will explore advanced features, including character rigging, dynamics, and visual effects, through hands-on projects. Designed for experienced users, this training enhances your ability to create sophisticated 3D animations and visualizations.

Podcasting Production Fundamentals

ThinkB!G Exclusive

Public Class
2 Days
This course covers the essential skills for producing high-quality podcasts, focusing on audio recording, editing, and post-production techniques. Participants will learn about equipment selection, sound design, and storytelling to create engaging audio content. Ideal for beginners and aspiring podcasters, this training equips learners with the tools to launch and produce successful podcasts.

Premiere Pro with AI BootCamp

Adobe

Public Class
4 Days
Introduction and Advanced courses combined as a 4-Day BootCamp, equipping participants with comprehensive video editing skills. Covering essential techniques and advanced workflows empowering them to produce professional-quality videos.

Premiere Pro with AI ACP Certification

Adobe

Public Class
4 Days
Certification Offered
This Certification BootCamp provides a 4-day immersive training experience that combines Introduction and Advanced courses with the ACP Certification Pack. Participants will receive an online exam prep tool, an exam voucher with one retake, and exam proctoring, ensuring they are well-prepared to achieve certification and create professional-quality videos.

Premiere Pro with AI Introduction

Adobe

Public Class
2 Days
This Introduction course covers the fundamentals of Adobe Premiere Pro, focusing on essential video editing techniques and workflows. Participants will learn to edit and produce high-quality videos using industry-standard tools. Through hands-on projects, students will develop skills in trimming, transitions, and audio editing, providing a solid foundation for enhancing their video production capabilities.

Premiere Pro with AI Advanced

Adobe

Public Class
2 Days
This advanced course delves into sophisticated video editing techniques. Participants will enhance their skills in color grading, multi-camera editing, and advanced audio editing. Through hands-on projects, students will learn to optimize workflows and utilize powerful effects, empowering them to create polished, professional-quality videos.

Premiere Pro Color Correction Techniques

ThinkB!G Exclusive

Schedule a Date
2 Days
This course offers an understanding of color correction and grading, tailored for experienced video editors. Participants will delve into color theory, technical aspects of color management, and advanced correction techniques through theory and hands-on exercises using Adobe Premiere. This course is ideal for video editors, filmmakers, and content creators looking to enhance their skills, with a basic understanding of video editing recommended but not required.

Storytelling & Script Writing for Video Production

ThinkB!G Exclusive

Public Class

2 Days

This course focuses on the art of storytelling and script-writing for video production. Participants will learn essential techniques for crafting compelling narratives, developing characters, and structuring scripts. Through hands-on exercises and real-world examples, students will enhance their skills in creating engaging video content that resonates with audiences.

Unreal Engine Virtual Cinematic Production Introduction

Epic Games

Public Class

2 Days

This course offers an Introduction to Unreal Engine, emphasizing its application in cinematic production. Participants will learn essential techniques in environment design, lighting, and animation through hands-on projects tailored for creating stunning visual narratives. Ideal for beginners, this training equips learners with the skills to leverage Unreal Engine's capabilities for cinematic storytelling and immersive experiences.

Unreal Engine Gaming and Interactive Applications Introduction

Epic Games

Public Class

2 Days

This course provides an Introduction to Unreal Engine, focusing on its use in gaming and interactive applications. Participants will learn key concepts of game design, level creation, and interactivity through hands-on projects. Ideal for beginners.

Introduction to Videography: DSLR, Mirrorless, & Mobile Devices

ThinkB!G Exclusive

Public Class

2 Days

This course covers essential video production techniques for professionals, including camera operation, lighting, and sound design. Participants will gain practical skills through simulated exercises and real-world applications, enhancing their ability to produce high-quality video content for various platforms.

Advanced Video Lighting: DSLR, Mirrorless, & Mobile Devices

ThinkB!G Exclusive

Public Class

2 Days

This course explores essential lighting techniques for video production, using simulation to enhance understanding. Participants will learn to effectively utilize natural and artificial light sources, master lighting setups, and create visually compelling scenes. Through hands-on exercises and simulated scenarios, students will develop the skills needed to achieve professional-quality lighting for diverse video projects.

Introduction to Videography & Advanced Video Lighting BootCamp: DSLR, Mirrorless, & Mobile Devices

ThinkB!G Exclusive

Public Class

2 Days

This BootCamp merges the Video Production Lighting Techniques and Advanced Lighting courses, equipping participants with a solid understanding of lighting for video production. Students will learn to effectively utilize natural and artificial light sources, master various setups, and apply creative techniques. Through simulated hands-on exercises and real-world applications, participants will develop the skills needed to create visually striking scenes, culminating in a final project that highlights their lighting expertise.

HTML Email

ThinkB!G Exclusive

Public Class

2 Days

This course provides a comprehensive introduction to creating effective HTML emails. Participants will learn essential topics such as email design principles, responsive layouts, best practices for coding, and testing strategies. Through hands-on projects, students will gain practical skills in building visually appealing and functional email campaigns that engage recipients and optimize deliverability.

HTML5 and HTML with CSS Introduction

ThinkB!G Exclusive

Public Class

2 Days

This Introduction course offers a foundational understanding of HTML and CSS, equipping participants with the skills to create and style web pages. Topics covered include basic HTML structure, semantic elements, CSS selectors, layouts, and responsive design techniques. Through hands-on exercises, students will gain practical experience in developing accessible and visually appealing websites, making it ideal for beginners and those looking to enhance their web development skills.

HTML5 and CSS3 for Responsive Web Design Advanced

ThinkB!G Exclusive

Public Class

2 Days

This Advanced course delves into responsive web design using HTML5 and CSS3, equipping participants with the skills to create dynamic, user-friendly websites. Topics covered include advanced layout techniques, media queries, flexible grids, and modern CSS frameworks. Students will engage in hands-on projects, applying best practices for accessibility and performance optimization, making it ideal for web developers seeking to enhance their design capabilities and deliver exceptional web experiences.

HTML5, HTML, CSS, & CSS3 BootCamp

ThinkB!G Exclusive

Public Class

4 Days

This BootCamp offers a comprehensive training experience by combining the Introduction and Advanced courses in HTML5 and CSS3. Participants will gain a solid foundation in responsive web design, covering essential topics such as basic HTML structure, CSS styling, advanced layout techniques, media queries, flexible grids, and modern CSS frameworks. Through hands-on projects, students will learn best practices for accessibility and performance optimization, empowering them to create dynamic, user-friendly websites.

JavaScript & jQuery - Intro

ThinkB!G Exclusive

Public Class

2 Days

This course provides a solid Introduction to JavaScript and jQuery, equipping participants with essential skills for dynamic web development. Students will learn the fundamentals of JavaScript, including variables, functions, and control structures, as well as how to manipulate the Document Object Model (DOM) using jQuery. Through hands-on exercises, participants will gain practical experience in adding interactivity to websites, enhancing user experiences, and implementing animations. This training is ideal for beginners looking to build a strong foundation in web programming.

JavaScript & jQuery with JSON & Ajax - Advanced

ThinkB!G Exclusive

Public Class

2 Days

This Advanced course focuses on JavaScript and jQuery concepts, emphasizing JSON and AJAX for dynamic web applications. Participants will explore techniques for asynchronous data retrieval, manipulating JSON data, and enhancing user interactions without reloading pages. Through practical projects, students will develop the skills to implement AJAX calls, manage API responses, and improve web performance. This training is ideal for developers looking to deepen their knowledge and create more interactive, data-driven web experiences.

JavaScript, jQuery, JSON & Ajax - BootCamp

ThinkB!G Exclusive

Public Class

4 Days

This BootCamp integrates the Introduction and Advanced courses on JavaScript and jQuery, providing a comprehensive training experience. Participants will start with foundational concepts and progress to advanced techniques, including JSON and AJAX for dynamic web applications. Key topics covered include asynchronous data retrieval, manipulating JSON data, and enhancing user interactions. Through hands-on projects, students will gain the skills needed to implement AJAX calls, manage API responses, and create interactive, data-driven web experiences.

WordPress

ThinkB!G Exclusive

Public Class

2 Days

This Introduction to WordPress course users will learn to set up and manage WordPress sites, customize themes, and utilize plugins effectively. Key topics include site configuration, content management, SEO best practices, and advanced customization techniques.

Learn ● Smart

Class Information

All classes are delivered through **Virtual Live Expert-Led classrooms**, with participants remoting into ThinkB!G computers—no software or installs required—and instructors having live screen access.

Standard Class Times (EST): 8:30 AM - 3:00 PM

Participants log into **ThinkB!G's Virtual Online Live Training (VOLT®)** platform to access ThinkB!G Student Computers, with all necessary software and class files pre-installed — no downloads required. Our expert instructors provide real-time support, and in-house IT support is available throughout the training.

Training Includes:

- Access to a remote training computer with all required software.
- Instruction by a Senior Instructor who provides immediate assistance.
- Digital course materials, a Certificate of Completion, and one year of access to training recordings (distribution prohibited).

Technical Set-Up Requirements:

To register, ensure you have:

- A primary computer or laptop.
- A second monitor or computer for viewing the instructor.
- Reliable high-speed Internet.
- Google Chrome or Microsoft Edge.
- A 3-button mouse.
- A speaker/microphone for communication.

Cancellation Policy:

Classes may be canceled if fewer than four students are registered or due to instructor changes. You will be notified at least 16 business days in advance. Cancellations or rescheduling more than 16 business days before the class are eligible for a refund or free rescheduling. For inquiries or specific requests, please contact us. We're here to support you every step of the way!

Jumpstart Your Project

PROJECT BASED TRAINING®
Learn ● Smart

Who is this for?

If you have a project, and an application or tool to learn, then Project Based Training® is for you! This can be designed for one-on-one, teams, and enterprises.

Why choose this?

By providing skills training on technology tool features that apply to the needs of a specific project, our clients can get skilled faster and continue production while learning.

How does this work?

Let's say you have a project to create a brochure in Adobe InDesign. With this service, you will get hands-on training from an expert on specific topics while you build your project!

Productive While Learning!

Blending project production with learning delivers the most efficient and productive training on the market today!

One-on-One or with Your Team!

Designed for Individuals & Teams, and Delivered Virtually Online Live from Anywhere.

Experts to Guide You!

Design your learning with our Certified Instructors and Expert Senior Developers to ensure your deliverables are achieved!

About ThinkB!G

Founded in 2000, ThinkB!G.LearnSmart is an industry trusted technology training and certification provider.

We deliver live instructor-led classes and support to major government, commercial, non-profit, and educational institutions on Adobe, Microsoft, Articulate, and many other technologies. We are an **Technology Training & Certification Center**, and an **SBA Certified Woman-Owned Small Business (EDWOSB)** serving Government clients via its **GSA Schedule contract**.

Our unique services include **SmartPass® Learning Licenses**, **Project Based Training®**, **Virtual Online Live Training (VOLT™)**, and **SmartSupport Technical Support Hours**, and **Professional Development services** including **eLearning** and **508 Accessibility**.

1980s

Christine Abunassar, Founder and CEO of ThinkB!G. Learn Smart, launched her career in the early 1980s, at the rise of the IT industry, bringing new technologies to market. In a tipping point for the first visual communications and presentation technologies, Christine was the U.S. Air Force Strategic Alliance Director leading the adoption, training and deployment worldwide of Harvard Graphics by Software Publishing Corporation.

1990s

Recognizing technologies would not reach user adoption without a skilled workforce, Christine spearheaded the delivery method of using technology to train and certify IT professionals–from anywhere. This led to Christine joining the original founders of Skillsoft, then known as CBT Systems, in the early 1990s, to forge the Microsoft Strategic Alliance that launched the industry's first technology-delivered certification training for Microsoft Certified Professionals. Christine designed and implemented the strategy and execution for using technology to train and certify Microsoft channel partners, customers, and employees worldwide. In this monumental shift and adoption of online learning as a viable, scalable training delivery alternative, a new industry standard for eLearning skills development was established. This innovative thinking, process improvement methodology, and passion for empowering it clients with skills are the pillars of ThinkB!G. Learn Smart.

2000s

With the foresight to accelerate learning performance to deploy skills training as a strategy, ThinkB!G was established as an eLearning consulting and development firm in 2000. In 2007 the company expanded its services and facility as an Authorized Certification Training and Testing Center for Adobe, Apple, Articulate and Microsoft. The company trains and consults prestigious government and commercial clients nationwide. ThinkB!G created a unique model of learning with its Project Based Training® where clients can "Learn While You Build" incorporating production as part of learning. The company's belief is that "Learning is Personal" giving clients that custom service specific to their organization's needs.

Now

We are a U.S. Government Small Business Administration Certified 8(M) Women-Owned Small Business (EDWOSB) and GSA Schedule Contract holder. Christine has previously served on the Technology Advisory Board for Howard Community College, Chair of the Howard County Maryland Equal Business Opportunity Commission, as well as Networking Chair and Board Member of the Howard Technology Council. Christine's passion is mentoring women in business and inspiring them to be entrepreneurs.
